

AFORE Solutions Signs R&D Service Agreement with an Access Networking Equipment Vendor

Ottawa, Ontario, Canada March 5 2007 - AFORE Solutions Inc. continues its success in the telecom/networking R&D outsourcing sector with the signing of a Master Business Agreement with a converged service access equipment company in the U.S.A. Under the agreement, AFORE will provide embedded software development services for the customer to deliver new features for its product family of wireless backhaul and service convergence applications.

"AFORE's in-depth expertise and track records in embedded software, Carrier Ethernet, PWE3, network processors and carrier grade system development gave us a competitive advantage over other R&D outsourcing companies", said Paul Kite, VP of Business Development, AFORE Solutions, "The customer was impressed with AFORE's capability to scale R&D resources, ability to provide varied expertise for existing and new projects while ensuring quality of deliverables and improved time to market for our customer's increasing market share in the access market."

About AFORE Solutions

AFORE Solutions Inc. is an embedded SW and HW solutions provider specializing in design services for networking companies. AFORE provides R&D solutions that accelerate our clients' time-to-market while reducing development costs and are based on proven reference designs, robust software components, engineering services and professional engineering processes.
