

Jonathan Reeves to Advise Technology Strategy Joins Strategic Advisory Board at AFORE

Technology Leader Jonathan Reeves Strengthens Management Team in Role as Chief Strategy Officer

Ottawa, Ontario, Canada May 25, 2007 - AFORE Solutions, Inc. leaders in the design and delivery of customized embedded software and hardware solutions for Network Equipment Providers, today announced that it has named another top technology leader and networking luminary, Jonathan Reeves to their strategic advisory board as Chief Strategy Officer. Mr. Reeves' expertise, covering a range of networking industries, brings a significant forward looking perspective of technology and markets to develop key technical trends, that will help to shape AFORE's industry and technological vision for future development and product plans.

"We are pleased and honored that Jonathan Reeves, a recognized technology leader, is joining AFORE's Strategic Advisory Board and assuming the responsibility of a Chief Strategy Officer," said Alex Berlin, President and CEO. "The combined technology and industry expertise Jon brings to AFORE will greatly increase our ability to develop a successful long term market strategy, establish strategic partnerships and expand our customer base."

Jonathan Reeves is a well-known leader in the development of forward looking technologies whose background spans successful start-up initiatives to high profile public firms. In 2002, Jonathan launched Mangrove Systems, (now owned by Carrier Access Corporation), leading the industry in Pseudowire access, aggregation and switching. Previously, Jonathan founded Sirocco Systems (acquired by Sycamore Networks), delivering the first intelligent optical edge switch and Sahara Networks (acquired by Cascade Communications), leading the successful development and deployment of advanced ATM access products.

"I am pleased to be working with AFORE in this capacity and together we can ensure that the company's technology direction and solutions are positioned strongly within the ATCA ecosystem. AFORE's approach helps equipment and silicon providers to accelerate delivery of complex networking systems to the market" commented Jonathan Reeves. *"I am impressed with AFORE's business achievements to date and look forward to assisting the management team in shaping the future direction of the company."*

Mr. Reeves' role as an advisor is to support AFORE's organization in making technical and strategic recommendations.

About AFORE Solutions:

AFORE is a provider of customized design solutions for Carrier Ethernet, Any Service Any Port Pseudowire, PBT, Wireless Backhaul, Broadband Access and high performance network applications. AFORE's solutions are based on standardized AdvancedTCA[®] applications, proven designs, AFORE InterPort[™] software components and customized design services.
Bringing Network Systems to Life[™]
