

AFORE Joins OpenStack™ Software Community

AFORE to work with OpenStack on CloudLink™ Cloud Security and Multi-Tenant Trust Platform Innovations

Ottawa, Canada; May 19, 2011 – AFORE Solutions, Inc., a leading provider of cloud security and Ethernet software solutions, announced that it has joined the OpenStack software community to collaborate on the development and enhancement of its CloudLink security and multi-tenant trust solutions. OpenStack is a collection of open source technologies working together to form a scalable cloud operating system. This system provides the infrastructure, comprehensive cloud management platform, and community that allows service providers and cloud solution vendors to deliver robust cloud computing services for today's market demands.

"While cloud platform solutions such as OpenStack address the all-important problem of providing a unified scalable platform, security issues remain for enterprises deploying into cloud environments," stated Alex Berlin, CEO of AFORE Solutions. "AFORE's CloudLink security platform will enable cloud providers to offer their customers and users the ability to confidently use cloud applications and assets with the assurance that their specific corporate security policies will be enforced in the cloud."

In addition to working with the OpenStack community on their software, AFORE will also leverage OpenStack technology in its product offerings.

About AFORE:

AFORE is a leading provider of cloud security and networking and Ethernet software solutions. Our unique blend of CloudLink™ virtualization software, ASE networking appliance and InterPort™ Ethernet software solutions enable enterprise, service providers and networking solutions providers to accelerate innovation and deployment of advanced networking applications.
