

## **AFORE™ launches Custom Engineering Services for VMware™ enabled Clouds**

**Ottawa, Canada; March 2, 2011** – AFORE has an eight year history in successfully delivering custom engineering projects for our customers and partners. Recognizing the Cloud Computing market demand for custom software solutions and leveraging our core competencies, AFORE has launched a new engineering service offering for VMware based Private and Public Clouds. With the combination of cloud computing expertise and the CloudLink™ platform, AFORE provides professional services to develop custom virtual appliances and cloud management solutions for both enterprise customers and Cloud Service Providers. The new service offering includes the following key areas:

- Evaluation of project requirements and definition of a potential solution architecture for VMware based clouds
- **Secure and trust multi-tenancy solutions** based on **CloudLink** software platform and technology
- Custom development and integration of **Cloud Management** applications leveraging expertise in vSphere™, vFabric™ and SpringSource™ technologies
- Secure **Disaster Recovery to the Cloud** by leveraging **Cloudlink** platform
- Development of **Cloud Service Gateways** to enable secure networking, CoS and SLA monitoring
- Custom design and integration of **Virtual Appliances and Management Tools**

AFORE has a proven track record of delivering high quality solutions while accelerating your time to market and reducing your engineering costs.

### **About AFORE:**

AFORE is a leading provider of cloud networking and Ethernet software solutions. Our unique blend of CloudLink™ virtualization software, ASE networking appliance and InterPort™ Ethernet software solutions enable enterprise, service providers and networking solutions providers to accelerate innovation and deployment of advanced networking applications.
